SUMMARY

I believe people are at the center of what we create. I am passionate about human connection, community, chocolate chip cookies and weaving digital narratives that bring great ideas to life.

WEB DEVELOPMENT EXPERIENCE

General Assembly, Washington, DC

Full-Time Web Immersive (July 2015 - September 2015)

Part-time Back End Development (March 2015 - June 2015)

Full-stack web development program focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development.

Developed a portfolio of individual and collaborative projects including:

- **Traversed** : Collaborative project collecting WMATA incoming bus times with the projected weather and presented this information as a RESTful API to a easily-browsable view. Built on Node.js, Express, with a PostgreSQL back end.
- **Remed.Me** : Individual project to create a medication reminder application with user authentication. Built on Ruby on Rails, using the Devise and SideKiq Ruby gems with a PostgreSQL back end.

Ruby For Good Hackathon, Fairfax, VA

Participant & Volunteer (August 2015)

Three Day hackathon working to redesign and build the Humane Society of Fairfax County website and content management system utilizing the Ruby on Rails framework.
